## **Abstract**

Quizzes in classrooms often take place on pen and paper. This application is aimed at such classrooms and to move them away from written tests to an online, secure platform for evaluation and testing.

## **List of Features**

1. Creating a Quiz
2. Choosing the Prize
3. Participating in a Quiz
4. Viewing Test Results and Winners

## **Feasibility Analysis**

A Linux VPS is enough to host such an application. It would only require Python to be installed as well as a server application like Apache or nginx.
